BY HENRY M. HYDE.

I would like to take one of the war ns into my home," she said. "I be't much care whether it be a boy or girl. But one thing I do insist on: it nest be an ugly child. Indeed, I really want a homely child. If it be crossjed, with faded red hair, so much the

"I have no children of my own. We are a good home, with a very vacant ce in it for a little victim of the war. All my life I have known what it is to e called homely. And I want a homely hild-perhaps, after all, it had better be a very homely little girl-to take care of and love and make happy. I know just how to do it."

Suddenly Very Beal. Yesterday the appealing figure of the

war orphan seemed to become very real to the people of Chicago and of the country round about. Far back and a either side of the three hundred miles t bloody trenches which bid the fightmen they saw the children, procesas of little children, driven from their ned homes, their fathers killed in battle, separated from their mothers, amping over the country, trying to keep

homes for permanent adoption or temporary care. From small towns and from farms in the middle west came other offers. Men sent and brought checks to help pay the great expense involved in gathering the children together and bringing them in safety and comfort ecross the ocean. Physicians, nurses, and one or two retired business men vol-

unteered their services. "The Tribune" Gets Ready.

Meanwhile THE TRIBUNE is commit aicating by cable with officials in Belrium, where the present need is greatest and most pressing. Dr. Evans of THE TRIBUNE staff is making progress in the organization of a supervisory and administrative staff. The whole undertaking is so unprecedented and so serious that THE TRIBUNE is using the utmost pains to properly safeguard every step. But the coming of winter makes haste necessary if the children are to be saved from added suffering.

One Chicago woman, who has just re turned from a trip through Austria and orthern France, undertaken since the war started, brings back with her a series of moving mental pictures which sent her hurrying down to THE TRIBUNE bureau early yesterday morning.

PAROLED CONVICTS MUST KEEP OUT OF CHICAGO.

Police Like New Rules, Which Also Give Revolver Bearers an Extra

Heads of Chicago's police departmen expressed satisfaction yesterday with an order just issued by the Illinois board of pardons regarding parole of gunmen, similar desperate criminals. Under the order of the pardon board as posted at the Jollet penitentiary none of this class of convicts will be paroled to Chicago here-

Other provisions of the order are that any one sentenced from Chicago must serve one more year on his sentence before being eligible for a pardon, if he carried a revolver at the time his crime was ommitted. Paroled convicts in the class described found in Chicago will be returned to Joliet. Convicts violating their parole will be required to serve the maximum of their remaining sentences.

Heads of Chicago's police department have asserted that 80 per cent of the crime in this city is committed by paroled crimtnais, who boast, they police say, of having sufficient political pull to preven their return to the penitentiary. Chief of Police Gleason, First Deputy

schuettler, and Captain of Detectives O'Brien said this order, if enforced to the letter by the pardon board, will be of great this country orders for a good many mil-lion dollars of our products. Their orders of gunmen.

Meeting in this manner the second requirement due next Monday will leave Chicago banks in a position to rapidly resume their normal status with reference to circulation and clearing house indebtedness among themselves.

this country, if the immigration authorities request it, they must be examined by doctors connected with the public health service.

"I doubt if a single child will be found who is suffering from a quarantinable disease," said Surgeon General Blue.

At this present time the public health service has only two physicians in Europe. Both are at Naples. Practically all enigration from northern Europe has been cut off and as there is little in the south many of the doctors have returned home.

Surgeons Will Examine All.

Whenever the children are ready to come to the United States, if the immigration authorities deem it necessary, one of the two public health surgeons now at Naples will be sent to examine them. In all probability, the immigration officials will not regard this as necessary, but will accept the certificates of physicians on the ground.

DOMESTICS AS TYPHOID CARRIERS. [From the New York Sun.]

In a recent issue of the Sun the danger from hitherto unsuspected sources, the kitchen and pantry, was emphasized by citing the fact that about 3 per cent of the population of Manila were proved cholera carriers, and most of these were engaged in handling food. Now comes the announcement in the Journal of the American Medcal Association of two epidemics of typhoid fever. The state department of health of Pennsylvania discovered in a recent investigation of a typhoid defense, it is a good time to impress a very fever epidemic at Lehigh university that forty students were infected by a kitchen employé who, spelling."-The Unpopular Review. though long since recovered from an attack of typhoid fever, still carried the germs.

Keep one to long distances, like San Francisco, Fresno, and seven other places mentioned, thus completely throwing investigators off their guard. The mos important lesson is obvious. Owing to the frequency with which epidemics have been traced to the hitherto obscure innocent carriers of the germ, all persons handling food should be not only cautioned but urged to cleanse their hands before touching food and whenever they are called away from its preparation, and b easily accessible to hot water, soan, and nat brushes must be supplied to make this precautionary cleansing convenient and efficient. WILL NOT CERTIFY PENSIONER. PLANS COMPLETED FOR CLASS. The state civil service commission has never made a rule that a person taking an examination in Chicago cannot be certified for a position in any other part of the state. Examinations are held in Chicago for positions open throughout the state. Examinations are held in some difteen places throughout the state and persons taking them are eligible to positions in Chicago. Only in two classes of positions in there are exception to this rule. For skilled labor positions, where the compensation is subject to union scales, the commission has divided the state into residence districts and persons must five in the district where the employment is sought. Also, in certifying pollement to state institutions, the commission requires that the persons certified must live requires that the persons certified must live in the county in which the institution is lo-cated, because it is necessary to have them sworn in as deputy sheriffs and only residents f the county can be so sworn.

PASTEURIZATION OF MILK. Riverside, Ill., Nov. 9,-[Editor of The Tribune.]-Albert E. There is no question in my mind of the merited rebuke administered to the diotatorial methods of the Republican party

in 1912. I also believe that the pun

ment when administered has been taken to heart and, like many others, have returned to a long time party allegiance, belloving in its principles, its efficiency, and its ability to represent the best interests of all the people.

I state these facts in order that you may know of the settlescribe which you may know of the satisfaction which feel in the belief that THE TRIBUNE henceforth going to be the support a leader of the Republican party, the par teader of the Republican party, the party which we hope and believe has been purged from the mistakes and folles of 1912. Your indersement of Lawrence Y. Sherman certainly had a great deal to do with the success of his hard fought campaign.

heated, highted, and maintained by the government and magnificently furnished with everything needed, including one of the finest services of silver in the country. He has all sorts of perquisites, comprising carriages and horses, wine from the royal callars, game from the royal preserves at Windsor and elsewhere, while the various ancient guilds of the city of London are compelled to furnish him with annual gifts appropriate to the industry and trade which they represent the saddlers' company sending him saddles, the cloth workers bales of fine cloth, the lace makers beautiful lace, and so on through the entire line.

Besides this the speaker is provided with a secretary, a chaptain, a counsel Chicago, Nov. 8.—[Editor of The Trib-une.]—In your excellent editorial on "Close the Ranks" you have well ex-pressed my own feelings, and I doubt not the feelings of many others who rose in

> WHAT THE MOTORMAN ENDURES.

Chicago, Nov. 9.-[Editor of The Tribune.]-"Safety first" seems to be the alogan at the present time, and it is a very good one. This is a big and busy city, people are rushing about, each intent on his own affairs, and it behooved us to use the utmost caution, not only for our own safety but for the safety of others. I have been employed as motor man for the last twelve years and can justly claim to know something of the conditions that confront that class of workers. In the first place, it is impossible for a motorman to give to his work the attention that it requires when he is constantly surrounded by people. He should be by himself. No one should be allowed to speak to him.

At present the motorman is warned by a sign over his head that he is not allowed to talk to the passengers, but what dif-ference does it make whether the motorelse does it? Distraction and lack of attention to his work are the result in either case. Our energies are depicted either case. Our energies are depl by long hours of service and by los by long hours of service and by loss sleep. We suffer intensely from the cold in the winter months, and our health is being ruined by the foul tobacco lader air that we are compelled to breathe day after day. Depleted energies mean loss of efficiency and that means more liability to accidents. And you who have had some one near and dear to you killed or crippled for life, you know what those accidents mean.

accidents mean.

There are many public spirited men and women in our city who are ever on the slart to better conditions, who would never rest until the necessary changes are made if they could see this matter at I do. Being constantly surrounded by the kind of people who frequent the front vestibule is a handleap that no motorman can overcome. Let us, in the interest of safety and decency banish not only the front end smoker but the front end passenger as well. Then our motormen can do their work in peace and comfort, giving their undivided attention to their work, thereby reducing the number of accidents to the minimum.

Federal Experts Also Urge the Killing of Show Animals Worth \$2,000,000.

Federal authorities yesterday increase heir efforts to stamp out foct and mouth among meat animals. An order was issued barring shipments of cattle from Canada into the United States, and federal quarantine was placed on New Jersey and Rhode Island.

stary of Agriculture Houston at the same time urged all state officials to operate with the government authorities to eradicate the plague. What was of greater interest to local dealers, however, was the recommended killing of the entire herd of 834 blooded cattle which have been in quarantine here since the national dairy show. The estimated value of this herd is \$2,000,700.

The federal quarantine against shippin Canadian cattle into the United States will have slight effect on the meat supply in this country, it is said. bureau of animal industry that the entire dairy show herd be killed came as a bombshell explosion among the owners of the blooded stock. They held a meet ing at the Saddle and Sirloin club, raised funds to fight such action by federal or state authorities in the courts, and retained Attorney John & Goodwin.

It developed that government officials from the outbreak of the disease among the dairy show cattle have recommended done with other infected herds. Illinois live stock commission and State Veterinarian O. E. Dyson, however, have favored keeping the dairy show cattle r close quarantine, in the hope of being able to cure the disease in time. CAN'T STOP RIDE ON PLATFORMS

Traction Head Admits No Ordinance Backs Up Car Rule.

STAND WHERE YOU LIKE

There is no lew forbidding a passenger to ride on the back platform of a street car. Municipal Judge Sabath yesferday discharged a man who had been arrested for refusing to obey a conductor's request to step inside a car. Officials of the traction lines admitted there was no ordinance to back up the ruling of the company and said that no appeal would be taken.

"We are perfectly satisfied with Judge Sabath's ruling in this case," said Leon-ard A. Busby, president of the Chicago Surface lines. "We expect different derisions according to the merit of the case. The rule is not a new one. It was made four days we have had the conductors enforcing it and every district superin-tendent has reported that the service has

T the club meeting A Mrs. Scott is always on time to the minute. With nerves and costume alike unruffled, she emerges from her Electric. No wonder Mrs. Scott considers it "the poetry of locomotion."

MISS SCOTT brings chums to the matineeand all delight in the rocmy, limousine-like luxury of the Electric. All enjoy its spotless, odorless, quiet comfort and safety.

A ND, in the same family Electric, Mr. Scott goes down to business daily and home again at night-quickly and pleasantly. He says no other car he ever owned gave him so much enjoyment and service.

An Electric meets every requirement of any city man

Remember that 98% of all touring car trips are within a 60-mile limit; and that 20 miles an hour is the fastest legal speed; and that, during much of the time, an ordinary automobile is out of servicelying idle because only an expert can drive it-being repaired stored away during inclement weather.

Then consider that an Electric with its ample mileage and plenty of speed-20 to 25 miles an hour—is a year 'round car—always ready, day or night, in any weather. Repairs are seldom needed-simple mechanism assures this. No chauffeur is required.

Many people fail to realize how wonderfully the Electric has been improved in the last few years. Neither money nor mechanical ingenuity has been spared to make the Electric the ideal city and suburban car.

DOWER for operation costs surprisingly little. And the records of the Commonwealth Edison Company show a constant decrease in electricity rates, while the cost of other sources of automobile power is increasing.

Cake-Making a Pleasure Now!

OVENGOLD does it-OVENGOLD makes the most delicious cake ever, and all you have to do is add water, then bake.

traces all to pieces?"

Buch a wonder! No trouble, no bad mak, no skill needed in making a fine cake now. You just add water to OVEN-GOLD, then bake, and there you are! Out comes a dainty, fluffy light-as-a-cloud yellow cake that will make you hungry just to look at it! You can't make a mistake. OVENGOLD has everything in it in just the right proportions—eggs, milk, butter, etc.—all ready.

Just you get a 25-cent pickage of OVENGOLD of your grocer and see. It takes all the hard work, all the work of beating eggs, and all the risk out of cake making. And only two dishes to wash afterwards! Best cake-makers in the world can't make a finer cake than you can make in three minutes with OVENGOLD.

Try OVENGOLD today and if it doesn't do flust as we say, your grocer will retain your money. Just see what fine cakes you can make. If your grocer doesn't have OVENGOLD, make him get it for you of his jobber—he can do it in one day's time—or send us his name and 25 cents for full size package prepaid. The Master Key

Does He Like Her?

Watch the leading moving picture houses of Chicago next week for the first installment of John Fleming Wilson's stirring drama of the Western gold fields written

especially for the *Universal* and produced with Mr. Wilson's personal assistance.

The Universal feels justified in declaring "The Master Key" as the most thrilling and interesting moving picture serial ever written, and believes the public will agree to this when the story has

been partly unfolded. The drama begins in the gold fields of California and extends from there to various parts of the universe where there is a wealth of natural scenery. The pictures in themselves are

magnificent beyond description and we earnestly advise you all to see the opening reels and follow them through to a most absorbing conclusion.

The story will run daily in the Chicago Daily News. It will be interesting to read the story version, and then on the same day or evening see the scenes you have read, enacted in picture by the Universal's greatest actors and actresses.

ICKES CONTROLS AFTER HOT FIGHT

M. J. Dempsey Chosen Chairman, with Harmony Shot Full of Holes.

The Progressive party "bosses" tri-umphed yesterday over the insurgents in the adjourned meeting of the county convention after a bitter wrangle of four hours, in which harmony was thrown to the winds. They put through their slate

without a scratch on it.

the meeting angry, although Mr. Knight himself declared that the Progressive party was a religion with him and that he intended to remain a true blue Progressive to the end of his days.

Marion Drake Scored. Most of the women who attended the meeting were with the Knight faction and they said a lot of things about Marion Drake, the First ward Progressive lead-er, who lined up with the Ickes faction at

the last moment.

Some of the women who were fighting for Knight stood at the back of the hall and expressed themselves without reservation about Miss Drake. They charged that she pledged her support to Knight as late as last Saturday, and that she had witched to Ickes over Sunday. They also allowed that the Knights had helped lib erally to finance Miss Drake's aldermanic campaign and they thought, to say the least, that she was ungrateful.

For three solid hours the convention was engulfed in a stirring debate as to how it should proceed to elect the chair-man. It was 6 o'clock before the first test vote was reached on the question as to whether proxies should be recognized. proxies recognized and on a roll call was defeated by a vote of 1,720 to 1,625.

Chicagoan Makes Strong Finish by Taking Last Two Frames of Bout.

BY RAY C. PEARSON. Milwaukee, Wis., Nov. 9.—[Special.]— harley White, Chicago's sterling light-

weight, fighting the most brilliant battle of his career, tonight gave World's Cham pion Freddie Welsh ten rounds of battlir that he always will remember. Many unbiased ringsiders thought a draw verdict would not be an injustice to either, but if there was a shade at all White deerved to be accorded the honors.

The Chicago boy made a great fight in the lightweight division. In the early rounds it looked as if the champion's cleverness and "safety first" policy would brick the Briton a triumph by a total rewide margin. Welsh, adopting aggressive tactics, dashed out of his corner just as soon as the first gong sounded. He urned loose his highly educated left hand with all the speed he possessed. .

> diana and Ohio the Latest Schools Favoring Plan of President James.

Urbana, Ill., Nov. 9.—[Special.]—Indiana and Ohlo today were added to the list of "Big Nine" institutions which favor President James' great plan for a postseason football game between the east and west for the Belgian relief fund. Northwestern, Purdue, and Iowa are not committed and Minnesots has not been heard from. It is said that the only definite opposition has seen from BUT APPROVE OF IDEA. definite opposition has come from President Van Hise of Wisconsin, and there is hope here that when he is convinced that there is no danger of a precedent of post-season games being established that he will consent to have the Badgers en-

listed in the mo Alumni Favor Idea.

Telegrams of approval continue to pour in to President James. Alumni of all the conference schools are strong for the idea. It is said to be a requisite that every conference school approve, otherwise there will be insufficient time in which to the carry out the routine procedure of the board and secure the concession by a majority vote.

The local belief is that if most of the institutions report in favor of abrogating the ban on post-season games for this occasion only, that the minority will be gracious and not insist on its legal rights.

Thance for Conference.

That the conference has never had such a golden opportunity to present itself in a favorable light is argued by the local supporters of the movement. It has a reputation for sticking to its ideas through thick and thin and cannot be accused of lightly passing up its ruise. Illinois and the other favorable institutions are willing to stipulate that even if the war should continue that the post-season idea will not be breached again.

So far no negotiations have been opened with the east because that would be impossible ustill conference consent had been secured.

Needles, Cal., Nov. 9.—Barney Oldfield, seasoned veteran of the automobile game, won the first leg of the Phonix road race from Los Angeles today. Starting from fifth place, he drove into the night control here in a wild burst of speed that carried him beyond the checking station. W. C. Durant, No. 2, tagged afterhim, and his accurate stop made him technically the first driver to check in.

Oldfield's elapsed time for the 308 miles from Los Angeles, where the start was made at 3:30 o'clock this morning, was 8:45:55; Durant, checking in one second ahead of him, showed elapsed time of 8:61:64. T. J. Beaudet, No. 1, was third in 9:14:55 and Olin Davis, last year's winner, fourth in 9:19:30.

Swinging and skidding on the slippery boulevard, the twenty starters for the 673 mile seventh annual Phoenix race, charged out of Los Angeles at a sixty miles an hour cip that sent F. J. Pink, No. 18, into the ditch fifteen miles out of Los Angeles. He was badly bruised and was taken to the hospital. His car went on with Tom Ely, his mechanician, at the wheel, only to drop out at the 100 mile mark. Two other drivers. Sprague and Bucklus, in No. 18, were hurt.

for the Chicago Evening American

Temperance Sermons,—says the REV. DR. OZORA S. DAVIS,

Pres. Chicago Theological Seminary.

Using cartoons from the Chicago Evening American for the subject of his address, Dr. Ozora S. Davis, president of the Chicago Theological Seminary, 20 N. Ashland Ave., spoke to 300 Sunday School superintendents and teachers at the Y.M.C.A. He was instructing them how to teach temperance to their charges on next Sunday, which has been designated as the World's Temperance Sunday.

"I want to call your attention to the cartoons in the Chicago Evening American," said Dr. Davis. "I think they have given us about as wonderful a bit of illustrated Sunday School material as we could get. They are better lessons for the children than can be found in the text books."

"If you tell a child that a certain lesson can be found in a certain book he displays little interest in it. But if you tell him that it is in 'The American,' they understand where they can find it and appreciate it because it is seasonable."

Artist Preaches Sermons

Then holding several cartoons clipped from "The American" before his auditors, Dr. Davis continued:

"The man who draws these cartoons and writes the short editorials beneath them preaches pretty well," he said. "When I first saw them I rubbed my eyes. I could

not believe I was looking at a daily newspaper. I said to myself: This will do something to 'The American's' advertising. But they had done something to their advertising before I saw the cartoons, and it was a mighty brave thing to do. It must cost 'The American' thousands of dollars yearly to refuse to print whisky advertisements.

"I am not here to advertise 'The American.' I have no more or no less regard for it in other ways than for other newspapers. But these cartoons and editorials are the things I do like, and it would have made no difference to me what newspaper they appeared in. I would have liked them just as well.

Advises Use in Sunday School.

"My advice to you is to go to 'The American' office and get copies containing one of these cartoons and use it for the lesson next Sunday. Any man can preach a sermon from one of them."

Here Dr. Davis took the cartoon printed this week showing a woman kneeling beside a man. She was fixing his coat, while he was pouring a drink out of a whisky bottle. Dr. Davis preached an impromptu sermon with the cartoon as the text.

"Thank the Lord," he concluded, "if some ministers don't dare to preach sermons on temperance, one newspaper does."

The expression was loudly applauded. He announced that he would try to secure reproductions of the cartoons to use in lantern slide lectures at the theological seminary.

Send for a booklet containing all the cartoons—published in the CHICAGO EVENING AMERICAN—the most extraordinary cartoons ever published on the evils of whisky drinking. Hearst Building, Chicago, Ill.

Old-Fashioned Clothes— But Whisky and Kneeling Women Are Still in Fashion.

Mending the Holes.

This picture is reproduced from the original made by A. G. Heaton, almost fifty years ago. You can tell by the clothes that it is an old-fashioned picture.

You know that the woman's dress, her way of fixing her hair, the man's hat and clothes belong to a bygone age, but THE PIC-TURE'S MEANING IS THOROUGHLY UP TO DATE.

The artist called this picture "Mending the Holes." A good name for it.

Many a woman is on her knees mending the holes made by whisky and man's selfishness.

And many a man today appreciates as little as this weak creature does the work that the woman does for him. There are two sermons in this old picture.

One is the sermon against whisky. It has been preached for And the other is the sermon against WOMAN SLAVERY,

which has disgraced the world for centuries.

It is reasonable to hope that two things will happen at about

First, the giving of votes and power to women.

Second, as a consequence of the first, the end of the whisky business, the end of that "legal traffic" in highly alcoholic spirits that make men worthless mentally, morally and physically.

Votes for Women" will take the whisky out of this man's hands, put back strength into his brain, make him behave himself and let that woman get up off her knees, to stand on her feet as she ought to do.

in adhering to first mortgages on improved Chicago real estate as the safest investment for trust funds has been justified by the fall in price of other classes of securities.

It is worth the trouble of inspecting and valuating real estate to be assured that no impairment of the principal of trust funds can occur in troublous times.

It is worth while to have investments that fall due in three or five years so that frequent reviews of the security and general business situation may be made to determine whether it is best to collect and reinvest or extend time of payment.

JOHN P. MARSH & CQ. TRIBUNE BUILDING

"A SAFE TRUSTEE"

Chicago, Rock Island & Pacific To Holders of 4% Collateral Trust Bonds of Chicago, Rock Island & Pacific Railroad Company

The Committee hereby gives notice that all bonds not heretofore deposited, desiring to participate in the benefits of the plan and agreement dated October, 1914, must be deposited with CENTRAL TRUST COMPANY OF NEW YORK, the Depositary under the plan, on or before NOVEMBER 21, 1914. Certificates of Deposit, which have been listed on the New York Stock Exchange, will be issued for all deposited bonds. Bonds may also be deposited in Chicago with Illinois Trust and Savings Bank, No. 233 South La Salle Street, and its certificates of deposit will be issued therefor.

There have already been deposited, or agreed to be deposited, with the Committee up to the close of business October 31, 1914, \$33,565,000 of bonds, which with the bonds deposited with the Dutch committee in Amsterdam, Holland (about \$7,000,000), together aggregate about \$40,565,000 of bonds, or considerably more than a majority of the outstanding bonds.

If the plan is to be carried through it will require the deposit of many additional bonds, and the Committee, therefore, urges that undeposited bonds be deposited without delay.

The total amount of bonds deposited here and in Holland is now \$44,573,

N. L. Amster of Boston, who claims to NEW TORK, Nov. 9.—Rather an easier tone was reported in the coffee marks: today. Two of the steamers which were reported overdue from Brasil at the end of last week arrived on Sunday with about 25,000 bags, while there was a decline of \(\frac{1}{2} \) did not be rate of Rio exchange on London, and the cost and freight market was a shade lower. General business continued quiet, however, and local spot prices were unchanged at 6\(\frac{1}{2} \) for Rio 7s and 10\(\frac{1}{2} \) for Santos 4s. Business through the liquidating committee of the exchange was quiet, with sales of 8,200 bags. December closed at 5.61c saked and May at 6.10c bid. The st-torneys for the Central Trust company assert that it would be fliegal to dis-tribute the stock without the deposit. The only course now open to Amster and his associates is an appeal from the court order making a block sale on Nov. 24.

Stock Brokers Back to Paris. PARIS, Nov. 9.—The records of the stock-brokers corporation were brought back to the headquarters of the corporation from Bor-deaux today in view of the expected reopen-ing of the cash stock market. A definite date for this reopening has not been set.

Library Bureau is now operating six factories. It distributes its product through forty selling branches. Its employees number nearly three thousand. It has tens of thousands of customers. Its annual sales amount to millions of dollars.

These are impressive figures. Yet they are incomplete—the most important item of all is missing. For Library Bureau's greatest asset is the Idea for which the business stands—the Idea of Service.

Library Bureau originated the card system, an innovation that has revolutionized the business world; that is in use in a million business houses; that has made it possible for men to keep, right under their eyes, a record of every department of their businesses—sales, employees, advertising, stock on hand, customers, quotations, etc.

Here are some other things that show how the Library Bureau Idea has been developed:

Library Bureau originated vertical filing. Before Library Bureau existed, men "filed" letters in drawers, boxes or on hooks. To find a letter a year old was a day's work. But now-1

Library Bureau originated the unit record deak
—a desk that has doubled the capacity of the worker and trebled his comfort. Seated in a comfortable chair, he has at his fingers' ends anywhere from 10,000 to 18,000 records-credit data, stock records, ledger cards, etc.

Library Bureau originated the counter height unit—card and filing cabinets, etc., combined so as to form a practicable counter. A saver of space and steps. Particularly adapted for offices where space is limited and rentals high.

And now Library Bureau is introducing a new—and better—method of filing—the L. B. Automatic Index. "Great" is the only word that describes it. It is quick-quick in, quick out. Makes correct filing easy and incorrect filing difficult.
